

# STIX

The great outdoors are truly great with the EcoSmart Fire Stix fireplace. Acclaimed, Barcelona-based designer Hiroshi Tsunoda has created a fireplace with a contemporary twist on the traditional campfire.

Known for exploring the possibilities of geometric figures, Hiroshi's unique EcoSmart Fire is both visually striking and practical – particularly in an outdoor environment.

Consisting of varying-sized tubular stainless steel 'sticks' that are secured around an efficient 3 litre burner, the EcoSmart Fire Stix is powered by clean-burning, environmentally friendly bioethanol. No smoke, no soot, no ash – Stix is a stylishly elegant hearth for lovers of outdoor living.

Effortlessly set up and easily repositioned, its bright flame will keep you captivated as well as comfortable for up to 8 hours.

Sturdily constructed from stainless steel, Stix is set to be a head-turner on patios and pergolas around the world.
