Fire
www.ecosmartfire.com

An iconic, open flame fire solutions for discerning designers, homeowners and architects, the Firebox 2100SS creates a talking point with design integrity at its core. Stainless steel and toughened glass construction merge seamlessly with virtually every décor and design brief.

The Firebox 2100SS is fuelled by two XL900 ethanol burners, making it an ideal choice for large outdoor spaces and open-plan interiors.

Key Features

Landscape Feature

Including the element of fire in in outdoor spaces creates an impressive style statement.

Fire Design Flexibility

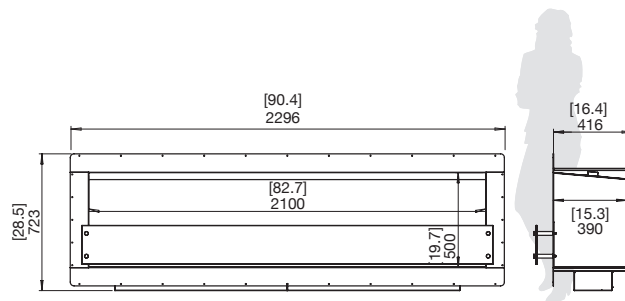

As there is no need for a chimney, flue or utility connection, the Firebox 2100SS offers the ultimate in fire design simplicity and flexibility.

Flue-less Fires

The endless flexibility that comes from a flue-less fireplace is appealing to architects, interior designers, builders and homeowners.

Quality & Craftsmanship

EcoSmart Fire bioethanol firebox systems are made from high-quality 304-grade stainless steel and are built to last.
